

High Efficiency CLOTHES WASHER Residential Replacement Rebate Program – Rebate \$50

Residential customers may receive a **\$50 rebate credit** for purchasing a qualifying High Efficiency Clothes Washer (HECW)!

Save Energy and Water: Clothes washers account for more than 20% of water used inside the home. Conventional clothes washers can use more than 40 gallons per load (gpl). In contrast, an HECW uses about 18-25 gpl and can hold larger loads! Using an HECW reduces water use and energy consumption. This adds up to savings for you and a big boost for the environment. Replacing old washers with HECW models helps ensure the future water supply is adequate and helps maintain low water rates.

What's in it for the Customer?

SAVE WATER! High Efficiency Clothes Washers use 30-50% less water. Customers with water meters will especially notice a difference. **SAVE ENERGY!** HECWs use less energy to operate. Also, with less water to heat, energy costs can be reduced about 50%, so you save there too. **SAVE TIME!** Better water extraction means less dryer time for more energy savings. Most HECWs have a larger load capacity than conventional washers for even more time and energy savings. **MORE SAVINGS: Save on Laundry Products!** HECWs use less water, so less detergent and softeners are needed. **Save on Clothing!** The tumbling motion of a HECW is gentler on fabrics which helps extend clothing life.
